When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

1. Read all instructions before using this heater.

2. This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. If provided, use handles when moving this heater. Combustible materials, such as furniture, pillows, bedding, paper, clothes, and curtains at least 3 feet (0.9m) from the front of the heater and keep them away from the sides and rear.

3. Extreme caution is necessary when any heater is used by or near children or infants and whenever the heater is left operating and unattended.

4. Always unplug heater when not in use.

5. Do not operate any heater with a damaged cord or plug, or after the heater has been dropped or damaged in any manner. Return heater to W.B. Marvin Manufacturing Co. for examination, electrical or mechanical adjustment, or repair. (See the section “For Repairs” on the back cover)

6. Do not use outdoors.

7. This heater is not intended for use in bathrooms, laundry areas and similar indoor locations, near water, and in the like. Arrange cord away from traffic and where it will not be tripped over.

8. Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar materials, such as furniture, pillows, bedding, paper, clothes, and curtains at least 3 feet (0.9m) from the front of the heater.

9. Do not allow foreign objects to enter the heater with the overhead light on.

10. Do not use the extension cord because the extension cord may overheat and cause a fire. However, if you have an extension cord, the cord shall be No. 14 AWG minimum size and rated not less than 1757 watts.

11. Do not insert or allow foreign objects to enter the heater with the overhead light on.

12. Do not attempt to service or repair this heater and return it. Please allow 2 weeks.

We appreciate your comments about our products and look forward to hearing from you. Thanks again for choosing Marvin.

Angus Randolph, President
W.B. Marvin Manufacturing Company

Congratulations! You have purchased the most advanced electric heater available today.

This model heater features an exclusive, replaceable heating element system (patent pending). In the event that a heating element in this heater should break, burn out or become inefficient, you can purchase replacement elements.

To find the nearest location of a retailer who sells Marley® Replacement Heating Elements, call our Customer Service Dept. Toll-Free between 9:00 a.m. and 5:00 p.m. EST for assistance. 1-800-733-1706.

REPLACEABLE HEATING ELEMENTS:
- This heater is equipped with a special guard locking device.
- This heater is equipped with a continuous capillary sensor that will shut the heater off when it gets excessively hot from being covered by clothing, etc. See instructions below.
- This heater is equipped with a Safety Thermal Sensor. This heater is equipped with a continuous capacitive sensor that will shut the heater off when it gets excessively hot from being covered by clothing, etc. See instructions below.
- Never use any harsh or abrasive cleaners on the heater. Clean exterior with a soft cloth, dampened with mild detergent. Also, do not sit, or allow a large pet to sit, too close to the heater - this could also cause the heater to overheat.
- Check to see if the heater guard or reflector is dirty. This could cause the heater to distribute heat poorly, ultimately causing it to overheat. (See cleaning instructions)

Cleaning and Maintenance - Make sure to disconnect the plug from the wall outlet before setting water to the tank or fragrance to the tray.

4. Do not drain the water immediately after the humidifier has been used because the temperature of the water is very hot.
5. One full tank will be sufficient for humidity for approximately 8 hours.

Cleaning and Maintenance - Make sure to disconnect the plug from the wall outlet before setting water to the tank or fragrance to the tray.

Overheat Light - When lit, indicates unit has overheated and has shut-off.

Removing Old Element
- Make sure the heater is unplugged and cool.
- Caution: heating element is glass, please handle with care.
- Grasp the element and push towards the right socket. This should allow the left end of the element to clear the left socket and allow you to remove the element.

Installing New Element
- Install new heater element into the card-socket holder. Install one end of the element into the right socket. Push into the element into the socket while guiding the other end of the element into the left element socket. (See photo below)

If you are reusing both elements, repeat the above procedure for the second element.

Close Guard
- Align the guard latch with the hole in the center of the heater. Push the guard latch firmly into the hole until it locks securely.

Starting Heater - Turn Temperature Control Knob to the right as far as it will go. Leave at this setting until the room has reached the desired temperature then turn the control knob to the left until the heater turns off. This is your ideal setting. The heater will start automatically when the room temperature drops below this setting and will turn off once the set temperature is reached.

Warning: The Freezeguard® feature does not insulate the area to be heated will not freeze - only that the unit will operate before freezing temperatures are reached. No Freezeguard protection is afforded in the event of a power failure.

HEATING ELEMENTS:
- Heating element in this heater should be replaceable heating element system.
- This model heater features an exclusive, replaceable heating element system.

OPERATING INSTRUCTIONS

1. Place on: only power indicator light on.
2. Humidifier Only Setting: for steam, fragrance only. Note: temperature control knob must be on high setting (5).
4. 1500 watt Setting: For both elements. Fan and steam / fragrance operation.
- Note: Only one quartz tube glows at the 800 watt setting. Both tubes glow at the 1500 watt setting.
- Note: It is not necessary to fill humidifier to use your heater.
